

KOHA SUMMER 2K16.

DATE:01-07-2016.

RECOMMENDER SYSTEMS:

1)Tried to modify the search code in koha and implement recommender systems .The attempt was unsuccessful.

2)We are now implementing three recommender systems.

i)Using Low Rank Matrix factorization and tf-idf.

ii)Item-Item Collaborative Filtering used by amazon.

iii)Based on Clustering models.

KOHA :

1) Koha is functioning well.Reading the official documentation manual of koha for better understanding.

2)Learnt customizing opac using html and here I attach the sample.It can be modified easily based on requirements and suggestions.
